Chandrashekhar Tulshiram Adhage

Staff Backend Engineer | Distributed Systems | Cloud-Native

+91 9975015476 cadhage@gmail.com linkedin.com/in/cadhage github.com/cadhage Mumbai, MH, India

Experience

Nomura — **Mumbai, India**
Lead Software Developer — *Feb '25 - Present*

- **Led organization-wide migration** from monolith to microservices, enabling independent deployments and improving release velocity
- Architected multi-AZ **Elasticsearch** cluster with sharding and replication, reducing latency by **60%** and improving user experience
- Designed and led platform-level caching infrastructure used across multiple services, enabling scalable data access for **50**M+ transactions
- Defined resiliency patterns (circuit breakers, bulkheads, timeouts), improving system stability and achieving **99.95%** availability at scale
- Engineered data **importer** service with decryption and in-memory caching, reducing latency by **50%** to **100ms** for **10M+** daily requests
- Partnered with product and engineering leads to define backend architecture, aligning system design with business and scalabilit goals
- Designed config-driven systems enabling dynamic behavior changes without redeployments, improving flexibility and release agility
- **Mentored** and technically led 8+ engineers and influenced architectural decisions across teams, driving adoption of backend patterns

Barclays — **Pune, India**
Lead Developer — *Oct '22 - Feb '25*

- Led migration of **17** services from OpenShift to **AWS**, defining DR standards and improving platform availability by **35%** overall
- Architected **OAuth2**-based authentication platform with token governance and access controls, reducing failures by **40%** system-wide
- **Redesigned** platform architecture during OpenShift to **AWS** migration, improving scalability, fault tolerance, and deployment flexibility
- Established code quality standards and CI/CD enforcement, improving maintainability and reducing production defects across services
- **Led end-to-end design of platform-level backend systems** across teams, enabling independent scalability and improving reliability

Standard Chartered Bank — **Bangalore, India**
Lead Technology — *Jul '21 - Oct '22*

- Architected microservices for high-volume analytics systems processing 30M+ daily financial transactions, optimizing throughput by 20×
- Designed service boundaries and API contracts to reduce coupling and enable independent scalability across high-volume microservices

3FramesLab — **Bangalore, India**
Software Engineer — *Feb '21 - Jun '21*

- Architected **gRPC-based** cross-language communication layer improving module interoperability by **45%** while ensuring low-latency
- Built backend automation services improving delivery reliability and handling production-scale traffic across distributed systems

Advanced Risk Analytics Private Limited — **Pune, India**
Software Engineer — *Jul '18 – Sep '20*

- **Implemented** and released an Android App developed with **Java 8**, **SQL**, and Android Studio, serving more than 2000 active users
- **Automated** an enterprise email response system built on **Java** and **Spring Boot**, improving collaboration for **2000** users

Indian Institute of Technology, Bombay — **Mumbai, India**
Teaching Assistant — *Aug '16 - Jul '18*

- Created and launched a **website** for the Cryosphere Lab, achieving a **60%** increase in online visibility for over **20K** active users
- Conducted **supervised** classification of Bhakra Forest on ALOS-2 datasets at **92%** accuracy processing over **10**GB of satellite data

Skills

- **Languages:** Java (8/17), C/C++, Python, JavaScript, SQL, Oracle DB, Shell Script, Groovy
- **Frameworks:** Spring Boot, Spring Security, JPA, Mockito, JUnit, TestNG, SonarQube, Hibernate, Spring MVC
- **Microservices and Tools:** RESTful APIs, gRPC, Kafka, Redis, Elasticsearch, Grafana, Prometheus, Jira, Nexus
- **DevOps and Cloud:** Jenkins, Docker, Kubernetes, CI/CD, Maven, Git, AWS, Terraform, GitLab, OpenShift, Ansible

Education

Indian Institute of Technology, Bombay — **Mumbai, India**
Master of Technology (M-Tech) — *Jul '16 – Aug '18*

Dr. Babasaheb Ambedkar Technological University, Lonere — **Raigad, India**
Bachelor of Technology (B-Tech) — *Jul '11 – Aug '15*

Achievements

- Achieved top rankings across competitive platforms: **HackerRank (1%)**, **HackerEarth (2%)**, **LeetCode (5%)** and **TechGig** (Expert)
- **Finalist** and Semifinalist in **Code Gladiator** 2019 and 2024 respectively, which had over **50,000** participants showcasing DS/Algo skills
- Semifinalist in **Google Code Jam**, demonstrating skills in coding, problem-solving skills among **62000** participants
- Secured a **96.7** percentile in GATE 2016 among **108495** students, demonstrating strong problem-solving and algorithmic skills at scale
- Participated in Growthgenie, TomTom Hack, Mylan Hack, **Honeywell** CODE2HON, HERE-a-thons, **Axis AI** and HDFC Hackathon
