Chandrashekhar Tulshiram Adhage

Backend Architect | Distributed Systems & Platform Engineering | 10+ Years

+91 9975015476 cadhage@gmail.com linkedin.com/in/cadhage github.com/cadhage Mumbai, MH, India

Experience

Nomura — **Mumbai, India**
Lead Software Developer — *Feb '25 - Present*

- **Architected** end-to-end migration of in-house caching layer from **Gemis to Redis**, redesigning repository architecture and service integration patterns to improve cache consistency, reduce latency, and reliably support **5M+** daily requests and **50M+** transactions
- Designed horizontally scalable, multi-AZ **Elasticsearch** architecture with shard allocation strategy, replication tuning, and autoscaling policies, improving latency by **60%** and sustaining peak throughput under production load across high-traffic real-time search workloads
- Established resiliency standards including circuit breakers, timeout budgets, bulkhead isolation, and load-shedding mechanisms, achieving 99.95% service availability across mission-critical, high-volume financial transaction processing systems in production
- Engineered a high-throughput data **importer** service to extract database records, decrypt sensitive fields, and cache responses in a custom in-memory layer, reducing latency by **50%** to **100ms** while sustaining **10M+** daily production requests under peak load
- **Mentored** and technically led **8+** engineers, driving **architectural decisions** and influencing backend strategy across multiple teams

Barclays — **Pune, India**
Lead Developer — *Oct '22 - Feb '25*

- Led strategic migration of **17** mission-critical services from OpenShift to **AWS**, defining disaster recovery standards (multiple AZ redundancy, backup policies, RTO/RPO targets) and improving platform availability by **35%** across high-volume production workloads
- Architected enterprise-grade authentication platform using **OAuth2**, token lifecycle governance, encryption standards, and fine-grained access controls, reducing authentication failures by **40%** across customer-facing digital banking applications serving millions users
- **Owned** end-to-end reliability for Multi channel application, resolving L3 incidents, leading RCA, and implementing preventive controls

Standard Chartered Bank — **Bangalore, India**
Lead Technology — *Jul '21 - Oct '22*

- Architected microservices for high-volume analytics systems processing **50K+** daily financial transactions, optimizing throughput by 20×
- Defined service boundary decomposition and API contracts to reduce inter-service coupling and **improve** independent scalability

3FramesLab — **Bangalore, India**
Software Engineer — *Feb '21 - Jun '21*

- Architected **gRPC-based** cross-language communication layer improving module interoperability by **45%** while ensuring low-latency
- Designed scalable backend automation services with high delivery reliability under production traffic

Advanced Risk Analytics Private Limited — **Pune, India**
Software Engineer — *Jul '18 – Sep '20*

- **Implemented** and released an Android App developed with **Java 8**, **SQL**, and Android Studio, serving more than 2000 active users
- **Automated** an enterprise email response system built on **Java** and **Spring Boot**, improving collaboration for **2000** users

Indian Institute of Technology, Bombay — **Mumbai, India**
Teaching Assistant — *Aug '16 - Jul '18*

- Created and launched a **website** for the Cryosphere Lab, achieving a **60%** increase in online visibility for over **20K** active users
- Conducted **supervised** classification of Bhakra Forest on ALOS-2 datasets at **92%** accuracy processing over **10**GB of satellite data

Skills

- **Languages:** Java (8/17), C/C++, Python, HTML, CSS, JavaScript, SQL, Oracle DB, Shell Script, Groovy, TypeScript
- **Frameworks:** Spring Boot, Spring Security, JPA, Mockito, JUnit, TestNG, SonarQube, React.js, Hibernates, Spring MVC
- **Microservices and Tools:** RESTful APIs, gRPC, Kafka, Redis, Elasticsearch, Grafana, Prometheus, Jira, Nexus, Git
- **DevOps and Cloud:** Jenkins, Docker, Kubernetes, CI/CD, Maven, Git, AWS, Terraform, GitLab, OpenShift, Ansible

Education

Indian Institute of Technology, Bombay — **Mumbai, India**
Master of Technology (M-Tech) — *Jul '16 – Aug '18*

Dr. Babasaheb Ambedkar Technological University, Lonere — **Raigad, India**
Bachelor of Technology (B-Tech) — *Jul '11 – Aug '15*

Achievements

- Achieved top rankings across competitive platforms : **HackerRank (1%)**, **HackerEarth (2%)**, **LeetCode (5%)** and **TechGig**(Expert)
- **Finalist** and Semifinalist in **Code Gladiator** 2019 and 2024 respectively, which had over **50000** participants showcasing DS/Algo skills
- Semifinalist in **Google Code Jam**, demonstrating skills in coding, data consistent problem-solving excellence among **62000** participants
- Secured a **96.7** percentile in GATE 2016 among **108495** students, demonstrating exceptional academics performance and analytical skills
- Participated in Growthgenie, TomTom Hack, Mylan Hack, **Honeywell** CODE2HON, HERE-a-thons, **Axis AI** and HDFC Hackthon
