Mumbai, MH, India

Experience

Nomura

Mumbai, India

Lead / Staff Software Developer

Feb '25 - Present

- Architected a high-throughput event-driven transaction engine handling **50M+** daily operations with strict **sub-100ms latency**, redesigning core repository service integration patterns to flawlessly sustain high-volume global payment execution loops
- Spearheaded a zero-downtime microservices cloud migration for **12** core engines, boosting continuous deployment velocity **3x** without interdependencies while successfully establishing completely isolated domain-driven pipelines
- Designed an enterprise-grade multi-tenant distributed caching framework across **10+** operational domains, cutting database pressure **40%** and network overhead **60%** while ensuring strict data consistency across downstream clusters
- Engineered a robust high-concurrency ingestion ecosystem processing over **10M+** daily files via parallel decryption to maximize multi-core CPU efficiency, drastically reducing processing runtime and eliminating historic data bottlenecks
- Founded the regional Architecture Review Board, actively coaching and mentoring **8+ Senior engineers** while unifying distributed system design patterns globally across enterprise teams to enforce strict architectural governance

Barclays

Pune, India

Lead Developer

Oct '22 - Feb '25

- Directed the strategic AWS cloud migration of **17** security microservices from legacy OpenShift, improving system availability and platform durability **35%** via active-active setups and robust cross-region disaster recovery engineering frameworks
- Architected a secure enterprise OAuth2 identity and access layer with rigid token lifecycle governance, cutting cross-service token validation faults **40%** across high-volume digital banking ecosystems serving millions of active global users
- Re-engineered distributed cloud infrastructure models to enforce horizontal scaling elasticity, significantly reducing annual operational AWS compute costs while keeping real-time production resource availability highly optimized under peak load spikes
- Established automated CI/CD quality gates and inner-source governance models, cutting production defects and setting global test-coverage targets to standardize premium software delivery metrics across cross-functional engineering pods

Standard Chartered Bank (via Synechron)

Bangalore, India

Lead Technology

Jul '21 - Oct '22

- Designed high-throughput financial stream architectures handling **30M+** records, unlocking a **20x** increase in ingestion loop capacity
- Formulated rigid domain boundaries and strict interface contracts, removing technical debt to let engineering teams scale independently

3FramesLab

Bangalore, India

Software Engineer

Feb '21 - Jun '21

- Developed a low-latency, **gRPC-over-HTTP/2** service communication platform, boosting cross-module interoperability by **45%**
- Designed asynchronous, highly concurrent worker pools to smoothly manage heavy real-time traffic bursts without resource leaks

Advanced Risk Analytics Private Limited

Pune, India

Software Engineer

Jul '18 - Sep '20

- Built optimized analytical transaction queries using **Java 8** and **SQL** for real-time risk engines deployed across **2,000+** B2B clients
- Automated asynchronous email alert and complex multi-tenant batch generation frameworks with **Spring Boot** to cut bottlenecks

Indian Institute of Technology, Bombay

Mumbai, India

Teaching Assistant

Aug '16 - Jul '18

- Programmed scalable geospatial mapping servers for the Cryosphere Lab, ensuring availability for **20K** active concurrent users
- Optimized parallel batch processing over **10GB** of satellite rasters, verifying advanced algorithms to yield a **92%** accuracy index

Skills

- Languages:** Java (8/17/21), C/C++, Python, JavaScript, SQL, Oracle DB, Shell Script, Groovy
- Frameworks:** Spring Boot, Spring Security, Spring Cloud, JPA, Hibernate, Mockito, JUnit, SonarQube
- Distributed Systems & Core Infra:** RESTful APIs, gRPC, Kafka, Redis Cluster, Elasticsearch, Grafana, Prometheus, Jira, Nexus
- DevOps & Cloud Architecture:** AWS (EC2, S3, RDS, IAM, EKS), Docker, Kubernetes, Jenkins, Terraform, CI/CD, OpenShift, Ansible
- System Paradigms:** High-Throughput Architectures, Domain-Driven Design (DDD), Monoliths, Distributed Consensus & Caching

Education

Indian Institute of Technology, Bombay

Mumbai, India

Master of Technology (M-Tech) – Computer Science/Engineering Tracks

Jul '16 - Aug '18

Dr. Babasaheb Ambedkar Technological University

Raigad, India

Bachelor of Technology (B-Tech) – Computer Engineering

Jul '11 - Aug '15

Achievements

- Ranked across premier competitive programming platforms: **HackerRank (Top 1%)**, **HackerEarth (Top 2%)**, and **LeetCode (Top 5%)**
- National Finalist & Semifinalist** in TechGig Code Gladiators (2019, 2024), competing in Data Structures/Algorithms among **50K+**
- Semifinalist in **Google Code Jam**, demonstrating elite algorithmic optimization capacity within a global cohort of **62,000** engineers
- Secured a **96.7 percentile** in GATE 2016 out of **108,495** candidates nationwide, proving mastery of core computer science primitives
